

Recipes for the automatic cocktails maker

Need to :

- Less than 5 ingredients, only one “solid”
- Needs no mixing (drinks with two colors ?)

Cocktails :

- Mojito (virgin)
- Grapefruit mocktail
- Spritz (virgin)

Recipes (for one glass) :

Mojito :

22mL lemon juice

15g sugar

200mL sparkling water

Mint

Grapefruit mocktail :

200mL grapefruit juice

15g sugar

Sparkling water

Spritz :

15g passion fruit

10mL

15g brown sugar

125mL sparkling water

Hardware

For the liquids :

Screen (27x27mm and 128x64)

ESP32 (55x28x15mm)

Rotary encodor (7mm diameter for the hole)

Push button (6x6mm for hole)

Electromagnetic valve (x number of bottle, 4 in my case but you can adjust)

For the solid (in development later) :

Servos motors
